

CUSHMAN®

SPRAYTEK XP

COVER MORE WITH PRECISION AND CONTROL

The new SprayTek XP features a smaller footprint and deep sump, allowing superior coverage on slopes and flat surfaces. The advanced tank design reduces chemical waste and agitation to ensure mixture, while also increasing operator visibility and stability with a low centre of gravity. A powerful, corrosion-resistant stainless-steel centrifugal pump provides a steady flow for spraying and agitation, while Life Guard silicon carbide seals increase durability and wear resistance. Choose from a petrol or diesel Kubota liquid-cooled engine, 2 or 4-wheel drive, and a multitude of control and boom options to experience the perfect spraying performance for your course.
