

Fast micro coring with your greens triple mower

Now that is revolutionary!
A greenkeepers' dream!

Hollow coring using a triplex, so quick and clean that the members will hardly notice it being done.

The Dyna-Corer's micro tines effectively remove thousands of tiny core plugs. An ideal thatch control or pre-seeding treatment. The coring depth can be precisely adjusted down to a maximum of 25mm.

Interchangeable solid tines are also available, plus NEW cross tines.

“One of those pieces of equipment that comes available every few years and is “Wow!” and it changes the way you maintain your greens.”

Solutions....

- Relieves surface compaction
- Prevents surface sealing to enable air and water to reach the root zone
- Effective thatch removal in dry weather without risk of cracking from deep grooving
- Excellent preparation before seeding
- Exceptionally smooth and quiet in operation

The side-ejection tines remove thousands of neat cores.

The discreet way to micro core your greens without your members noticing or objecting – do it with your greensmower!
