

Dyna-Spiker

The Dyna-Spiker produces neat deep slits and an undisturbed surface.

Solutions...

- Penetrates when the ground is too hard for even Sarel Rollers to have an effect
- Allows air, water, wetting agents and fertiliser to revitalise the roots and keep the turf healthy
- Can be used any time of year with minimum disturbance

Powered spiker & slicer

Similar to a Sarel Roller, but utilising a patented powered vibration principle, the Dyna-Spiker drives its spikes deeper into the root zone, and opens up a longer slit.

When golf greens become hard in summer drought conditions, the Dyna-Spiker's vibratory spiking action is the solution, powering its spikes through the hard surface and deep into the root zone.

These versatile units provide you with an effective means of opening up parched greens to enable irrigation, wetting agent or fertiliser to penetrate.

This machine is an exceedingly versatile item of aeration equipment that you can use all season long, giving you excellent value for money.

“Wow - there is absolutely no disturbance!”

“Nothing else penetrates as deep without using a tractor mounted implement.”
