Solutions...

- Three separate rollers follow undulations
- Hydraulic folding for quick and easy operation
- Fits to mid size compact tractors
- Quickly restores the surface of your pitches

Hydraulic folding

Multi-Roller		
Working width	Transport width	Weight
5.4m (18') or 1.8m (6')	2.5m (8'2")	650kg

Fast, lightweight rolling

If you have a large area of turf that needs a regular light rolling, the Multi-Roller has been designed for just that! It has been specially developed to meet the needs of Football Academies and Sports Complexes with several pitches that require a regular light rolling to restore the surface between games.

Covering a massive 18' (5.4m) working width, and yet weighing only 650kg, the secret of its effectiveness is its small diameter rollers which give a greater rolling pressure for their weight than large diameter rollers would do.

Used in conjunction with just a mid range compact tractor, it is now possible to roll a full pitch in approximately 20 minutes!
